

**NEW EXPERTISE CENTRE ON INFOR LN AND INFOR CLOUD SOLUTIONS FOR MANUFACTURING WILL ENSURE MAINTENANCE FOR EUROPEAN COMPANIES DIGITAL TRANSFORMATION.**

*IPL Consulting and 2WS have entered into an agreement that aims to innovate enterprise systems of European industrial companies bringing together teams, best practices and long-standing expertise on INFOR solutions and technology.*

**IPL Consulting and 2WS**, European leading Infor's Channel Partners focused on industrial manufacturing solutions announced about collaboration agreement and creation of **Infor LN Cloud Solution Center of Expertise**.

IPL Consulting and 2 WS have long time experience as Infor Partners in implementation of **Infor LN** and **Infor CloudSuite**. Combining the expertise and project teams of two leading Infor partners will enable digital transformation projects in large and medium-sized international and European companies. International solution provider will ensure customers with the high-level deployment, migration, and support services of Infor solutions, using the best practices, consolidated projects planning and proven execution processes.

The joint team of IPL Consulting and 2WS will propose customers the expertise of more than 140 consultants and technical specialists of Infor LN CloudSuite and extended Infor products as dEPM, CPQ, WFM, Supplier Exchange, with various specialization in industries as IE&M, Automotive, Industrial Machinery, Engineering & Construction, HT&E.

In addition to pooling resources for the benefit of customers and prospects and extending geographical coverage, the partnership also includes the creation of an **Expertise Center and Training Academy for Consultant**.

Wide number of successfully implemented projects at major industrial enterprises, intensive growth of companies in the last three years boosted the basis for the creation of a joint Training Academy, which should leverage experience of both teams and extremely increase the scope of highly effective Infor Cloud Solutions experts.

*“2WS and IPL believe in the power of team work, collaboration and mutual commitment”, underlines Marcello Siliano, 2WS managing partner “Our mission is to support large and medium-sized European manufacturing enterprises along the crucial path towards the digital transformation of their processes. We want to be the right consulting team able to couple a strategic vision with a pragmatic and goal oriented project approach.”*

*“Our goal is to become trusted international technology partner for European industrial enterprises, capable of boosting the digitalization process and moving to the Cloud. IPL Consulting knowledge base and competence management maintaining will contribute to the successful operating of the joint Expert Center and Training Academy”, comments Vladimir Kapustin CEO IPL Consulting Group. “We are sure that our joint team with extended international expertise will help many companies in the EMEA*

*manufacturing sector in LN Cloud Suite implementation and bring lots of benefits of operational excellence”.*

The future demands smarter manufacturing and cloud technology. For manufacturers moving enterprise to the cloud may feel like a major uncertainty. But being well-informed about the processes and migrating the system to the Cloud with the reliable service of experienced professional team helps avoid risks and set an agile course for cloud deployment.
